Leap of Faith By Drifty https://www.patreon.com/DriftyGames

> This walkthrough intends to show all the paths through the game in an objective way. Colors and styles are only meant to highlights elements, not influence your decision. There isn't a right or wrong way through the game, only <u>you</u> should decide.

Only decisions that have an impact on the story or your character are shown. There are obviously many scenes that can play differently based on your choices, but "cosmetic" differences or small alterations in the dialogues are not part of this walkthrough.

The PDF is best viewed on a touch screen where it is easy to drag, zoom in and out with the fingers.

On a PC with Acrobat Reader, make sure to use the "hand" icon to easily drag with the mouse. Use *Control* + Mouse wheel to zoom in or out.

Legend

lcons

Flow Symbols

Skip until the next section

When something you do can have an impact later on in the game, a label will be visible where it happens like this a short description ^{#123}

References to this label will also include the same number so it is easy to track it down to where it happened (could be multiple places). did do something ^{#123}

Check the last page of the walkthrough to learn how you can use the developer console to cheat alter their value for your benefit: Cheat without a MOD (<u>link</u>).

Enjoy the game!

Morning Tasks

When texting Kira and Robin, you can select which one you will vist first (see you soon vs see you later) but it only changes the dialogues a bit

Stephanie is available only if invited Stephanie to join #56

Cheat without a MOD

So you want to try out a new branch but do not feel like completely starting over a new game?

Don't worry, with the developer console you can easily modify in-game variables. You only need some basic understanding of scripting, no MOD required.

First of all, you need to enable the developer console, if you are lucky it is already enabled, type Shift+O in the game (Hold the SHIFT key and type the letter O). If not, close the game, go to the game directory and either create a file named options.rpy or edit with a simple text editor (e.g.: Notepad) if it already exists. Write the following lines at the end:

```
init python:
    config.developer = True
```

Note: There are 4 spaces before 'config.developer = True'

In some rare cases the game might start correctly once but crash after that. If that happens delete the file options.rpyc that gets created automatically when starting the game with the file options.rpy

Start the game and load a savegame, type SHIFT+O to open the console and use the ESC key to exit

Character variables

variable: The variable

definition: what it represents

set variable / new value: what to type in the developer console to turn the variable on or set a new value unset variable: what to type in the developer console to turn the variable off check current value: what to type in the developer console to check the current value

variable	definition	set variable / new value	unset variable	check current value
meFlirty	Flirty	meFlirty = value		meFlirty
meRomantic	Romantic	meRomantic = value		meRomantic
meSporty	Athletic	meSporty = value		meSporty
XPcece	Cece relationship points	XPcece = value		XPcece
XPchris	Chris relationship points	XPchris = value		XPchris
XPkira	Kira relationship points	XPkira = value		XPkira
XPlexi	Lexi relationship points	XPlexi = <i>value</i>		XPlexi
XPlinda	Linda relationship points	XPlinda = value		XPlinda
XProbin	Robin relationship points	XProbin = value		XProbin
XPstephanie	Stephanie relationship points	XPstephanie = <i>value</i>		XPstephanie
ep7CeceCalm	Cece calm points	ep7CeceCalm = <i>value</i>		ep7CeceCalm

Game Decisions Variables

label: The label as found in the walkthrough

set variable: what to type in the developer console to turn the variable on unset variable: what to type in the developer console to turn the variable off check current value: what to type in the developer console to check if the variable is on
